

Pedro Duque

54 Ministro Viveiros de Castro, Rio de Janeiro, RJ | phone: +55 9 4590-1974 | e-mail: pedroduque.eng@gmail.com

Key Qualifications:

- More than 7 years of experience in structuring data;
- Experience in project management (Scrum and PMO);
- Fluent English, Portuguese, Spanish, and intermediate French;
- Industry Experience: Mining, Supply Chain, Finance, Agriculture, Oil Refining, Gas, Transportation.

Technical Expertise

- Python (Data Wrangling, Statistics, Jupyter, Django, PySpark);
- SQL (PLSQL, TSQL and SparkSQL);
- Data Orchestration and Processing (Alteryx, Step Functions, BW, Airflow, Docker, Kubernetes, EMR, Databricks, Data Factory, Lambda, Azure Function);
- Databases (Oracle Spatial, SQL Server, MySQL, HANA, Athena, Redshift, Synapse Analytics, MongoDB);
- BI (Tableau, Qlik Sense, Webi, Sap Analytics Cloud, Power BI);
- CI/CD (Git, Azure Devops, Terraform, Azure Pipelines, AWS Code Build);
- GIS (Arcgis, Qgis, Geomedia, AutocadMap, Civil3D, AutoCad)

Education:

- Databricks Accredited Lakehouse Fundamentals – Databricks Academy (05/2024)
- Data Engineer – postgraduate – PUC – (04/2023 – 04/2024)
- Big Data with Databricks: Unified Data Platform, Developing your first pipeline on Apache Airflow – The Plumbers - (2023-2022)
- Azure Databricks & Spark for Data Engineers (PySpark / SQL), Apache Kafka for beginners - Udemy - (2023-2022)
- Serverless Computing with Azure Functions, Kubernetes Quick Start, Docker Quick Start, AZ-900 Microsoft Azure Fundamentals, Introduction to Azure, Azure Concepts – A Cloud Guru – (2022 - 2021)
- Ielts General Training Certificate – Score 7 – (08/2021)
- Version Control with GIT - Udacity - (2020)
- Escuela Bellavista, General Spanish Course - (10/2018 12/2018)
- Data Science II – Udacity – (Nanodegree) – (04/2018 – 09/2018)
- Tableau for data visualization - Udacity – 2018
- Data Science I – Udacity - (Nanodegree) – (01/2018 – 03/2018)
- ILAC International, Business English Course (Toronto, Canada) (07/2016 – 10/2016)
- Bachelor's Degree in Civil Engineer (long term) 2009 – 2015

Awards Received:

- Special Recognition (Komatsu, April 2023);
- Collaboration and Perseverance (Komatsu, December 2022);
- Authenticity, Collaboration, Overcoming and Perseverance (Komatsu, December 2022);
- Komatsu Spirit (Komatsu, April 2022);
- Samurai of the Week, Samurai of the Month and Samurai of the Year Awards (Komatsu, April 2022);

Projects which made a change in my career path:

- **Parabolt:** The project was an implementation of AWS Cloud for data solutions in Coca Cola Andina. The consulting company (Seidor Analytics) that I used to work and AWS were partners. During the project, I discovered a new world and learned so much through the experience exchanged by the AWS Data Lake Architects. I learned many cloud concepts that are not explained by courses or are unknown by experienced professionals.
- **SGGR-116:** It was the first project that I needed to use my leadership skills. My colleagues were experienced in different fields, and they had different behaviors at work, one was highly motivated and the other was high experienced in the demanding tasks. During the work I learned how to balance the tasks between my colleagues. And how to help others to construct their path and when to let them follow their own path.

Professional Experience:

Rethink – (10/2023) – current, location: Brazil

Occupation: Senior Data Engineer → full-time

- Development of Data Pipelines using Azure Data Factory, through the medalion architecture (Bronze, Silver and Gold Layers);
- Data Lake Virtualization through Azure Synapse Serverless Pool (Databases, SQL Authentication, External Resources);
- Metrics implementation from Microservices processed by Azure Service Bus and error logs from MongoDB;
- Deployment of Azure Synapse Workspace, Data Lake Gen2, KeyVault, Containers, Networking and Firewall configuration through Terraform and Azure Devops Pipelines.
- Creation of Lambda Functions with CI/CD flow through CodeBuild and orchestration via Step Functions. Scheduling using Event Bridge rules for executing Python batch scripts for small data volumes. Implementation of Layer for library execution.

Leblon Consulting | Argonout Gold (10/2023) until (01/2024), Canada

Occupation: GIS Drafter

- Creating drawings in AutoCAD and 3D surfaces;
- Updating the Propeller website with drone and GPS survey data;
- Generating daily reports including research information updates;
- Checking inconsistencies regarding the project and tracking quantities.

First Service Residential – (06/2023) until (09/2023), location: Canada

Occupation: Heavy Duty Cleaner → full-time

- Cleaning services of residential buildings

Komatsu - (06/2021) until (04/2023), location: Chile

Occupation: Data Engineer → full-time

- Orchestration of ETL processes through Kubernetes Cronjobs, DataFactory and Airflow;
- Responsible for promoting projects to production environment, password encryption by Azure KeyVault, Infrastructure request (Blob Storage, Schemas, Users, among others).
- Creation of Azure Pipelines in Azure Devops for Bash projects using Python;
- Development of codes in Python occupying libraries of Blob Storage, Pandas, Data, Unzip. Airflow providers, among others;
- Code Versioning through Azure Devops;
- Creation of data models in Azure Data Warehouse and Synapse Analytics Serverless;
- Extraction and integration of data into MongoDB database. Construction of unstructured Data Models in Json format.
- Configuration of a Databricks Workspace in collaboration with the Devops team, App Registration, Secret Scopes, Data Lake Mount and others.

Seidor Analytics - (06/2019) until (06/2021), location: Chile

Occupation: BI Analyst → full-time

- Build of DataLakeHouse through AWS S3, Athena and Redshift, orchestration by Step Functions and processing with EMR;
- Construction of Data Warehouses using HANA and BW as Databases and ETL tools;
- Creation of ETL process with diverse data sources, SAP ECC, SQL Server, Excel and CSV files;
- Big Data extraction processes using Alteryx to call API's and treat data;
- Python scripts refactoring, picking optimization for "Bottling Warehouses" using Django framework;
- Development of Dashboards in Tableau, Power BI, SAP Analytics Cloud and Analysis for Office.

B-Tech | Becton Dickinson - (02/2019) until (06/2019), location: Chile

Occupation: BI Consultant → full-time

- Creation of automated reports by ETL processes using Qlik Sense Enterprise as a visualization tool;
- Reports of Aging, Bad Debt, DSO, Transactional Volume, Transactional Cost, SLA, Order Entry, and others;
- Supporting the Shared Service Center Chile at the following areas: Rec to Pay, Customer Service, Travel and Expenses, Treasury, Finance, Closing and General Ledger.

HEXAGON | Petrobras - (04/2015) until (05/2016), location: Brazil

Last occupation: Solution Analyst – Scrum Master - Period: 01/2016 – 05/2016 → full-time

- Team leader of the GIS project, GISABAST (system that allows visualization and edition of spatial data from 15 Refineries in Brazil), supporting Petrobras Refinery Sector. (Outsourced professional);
- Presentation and decision making with the customer about the project demands;

Previous occupation: Solution Analyst – Scrum Team - Period: 04/2015 – 12/2015 → full-time

- Support the refinery sector of Petrobras as outsourced professional;
- Preparation and adaptation of diverse data to geographic format;
- Maintenance of Development, Homologation and Production databases of applications (Geoportal and SmartClient);
- Creation and updating of tables and spatial views through SQL language;
- Production of spatial metadata according to the national regulations (INDE) and the FGDC standard.

ENGGEOTECH - (11/2013) until (03/2015), location: Brazil

Last occupation: Project Coordinator - Period: 07/2014 – 03/2015 → **full-time**

- Geoprocessing Coordinator for the project SGGR-116 (Road Geotechnical Geological Management System) in association with COPPE, CRT and ANTT.
- Implementation of susceptibility maps on the BR-116 highway, through aerial photographs, digital elevation models and data collected in the field, the study area corresponded to 237 km²;
- Elaboration of maps: Hypsometry, Declivity, Localization, Geological, Geotechnical, Hydrological, Land use, Preliminary Landslides and Susceptibility to Earth Movement

Previous occupation: Geotechnical Intern - Period: 11/2013 – 07/2014 → **part-time**
